

Payroll Integration Partners

More payroll provider partners mean more ways to simplify plan management.

We collaborate with a broad network of payroll providers to support you in:

- **Reducing the time and effort** required to share payroll and census data with us (180 integration).
- **Ensuring payroll records are accurately updated** when participants make changes through our website (360 integration via Direct 360 or through a payroll aggregation firm).

To [Learn more](#), or for personalized assistance, please contact your Client Service team.

Important Note:

The payroll providers listed below represent those with whom we currently have established integrations. If your provider is not included, we recommend reaching out to them directly. They may offer varying levels of support. We are able to accept files from any payroll provider that can generate data in one of our standard formats and are willing to submit it to us directly.

For plan sponsor use only. Not for distribution to plan participants or the public.

¹ A **payroll aggregator company** is a third-party service provider that facilitates the integration and transmission of payroll data between employers and other systems, such as retirement plan administrators, benefits platforms, or government agencies. Additional fees may apply when working with a payroll aggregator.

² Direct 360 with ADP for Workforce Now clients is available using ADP Databridge. **Any integration opportunities with ADP do not include their RUN product.**
